Android Applications (Any tablet other than iPad)

- ibis Paint X
- Canva

Setting up a Canva Account

Parents must set up application for child

- **Open the app or website:** Download the Canva app from your device's app store or go to canva.com in a web browser.
- **Initiate sign-up:** Look for and select the "Sign up" or "Start designing" button on the homepage.
- **Choose a method:** You'll have several options to create your account:
Email: Select "Continue with email," enter your desired email address, your name, and a password

Google/Facebook/Apple: Choose the "Continue with Google," "Continue with Facebook," or "Continue with Apple" option

- **Provide information**

- If using email, you will receive a verification code in your inbox. Enter this code into Canva to confirm your email address.

- If using another service, you'll be prompted to log in to that service and grant permissions to Canva.

- **Complete setup:** After verification, you may be asked to specify how you will use Canva (e.g., student, teacher, personal, small business) and create a team. You can then start designing.

Media Transfer

Students must also have a way to transfer media to the instructor for certain activities. Have an email account available on their device to transfer project files for print outs and presentations.
